

## RFM-RX2

Wireless M-Bus receiver

### Description

The **RFM-RX2 receiver** is an USB dongle suitable for reading and setting of the wireless modules of the families Hydrolink, Hydroclima and Hydrocal produced by BMeters.

The RFM-RX2 is developed to be used in combination with Bmeters software to let configure and read the metering radio modules for heating and water consumptions.

It is equipped with one SMA connector and removable and 360° directionable antenna.
