

NEW ELECTRONIC PULSE EMITTER MODULE

Mod. IWM-PL4

B METERS are pleased to announce the introduction of the new Electronic Pulse Emitter module mod. IWM-PL4 compatible with the new Woltmann water meter mod. WDE-K50.

The main features of the new version are the following:

- 4-wire electronic pulse devices, open collector type
- 3-coil inductive sensor for flow direction detection
- Absolute count function: for reverse flow volume compensation the flow count is not resumed until the reverse flow volume has been fully recovered
- Reverse flow volume counting function
- Dosing Function:
allows to set a volume target, at which the module will send an electronic signal

NFC APP

- Pulse value and device programming using the freely downloadable APP **NFC-IWM-Config** available on GOOGLE PLAY for ANDROID smartphones

All the datasheets and manuals are available on our website www.mwatechnology.com

For additional questions or clarifications on the installation procedures, please contact our Technical Support dept. siteservices@mwatechnology.com
