

## INSTALLATION

Install as many secondary meters as required per property whilst retaining your power utility meter to pay for your main supply.

**Metro Prepaid** secondary meters are coded for use on the **Metro Prepaid** vending network only.

Secondary meters may be installed by any qualified electrician. The installation must comply with BS 7671 (IET wiring regulation).

**Metro Prepaid** registered secondary meters must be installed below or "downstream" of a main power utility meter.

Existing Power Supplier

## REGISTRATION

**Metro Prepaid** registers each prepaid secondary meter to the owner of the property where it is installed.

Join the hundreds of property owners that register secondary prepaid meters with us every month.

Registration can be done via email, phone or on-line with our Help Desk in as little as 10 minutes.

Registration information includes:

- Property address
- Property owner name, date of birth, contact numbers & email address
- Nominated bank account to receive payment

# WHO ARE WE

**Metro Prepaid** helps landlords collect electricity payments from tenants using secondary prepayment meters.

**Metro Prepaid** prepayment meters are available through a national network of electrical wholesalers and retailers in the UK. Landlords contract their own electricians to install the meters.

**Metro Prepaid** collects electricity usage payments for landlords by vending power codes to their tenants.

Secured 20-digit power codes may be purchased via a network of 29,000 stores across the UK (PayPoint) and by cash deposit or internet (see **Buying Power Codes** section)

Tenants use the meter keypad to key-in the power codes. The meter will display how many kilowatt hours (kWh) of power has been credited.

The proceeds of power codes sold to tenants are accumulated during any given month, and repaid to the landlord in the first week of the following month. The landlord uses the funds to defray it's main utility bill.

**Prepaid Secondary Meters for:**

- Housing Associations
- HMOs (houses of multiple occupancy)
- Commercial multi-tenanted properties.
- Garden rooms
- Private Solar

Prepayment solutions in association with:

# BUYING POWER CODES
