MULTICAL® 803

Heat and cooling meter for trade and industry

- Fully programmable data logger with minute loggers
- 2 second integration interval
- 4 communication modules
- 7 or 8 digit display resolution
- User-friendly interface with 3 push buttons
- Large backlit display
- IP65 density
- 6-year battery backup
- Auto Detect of Kamstrup's ULTRAFLOW®
- Auto Detect of Pt-temperature sensor

Description

MULTICAL® 803 is a robust and all-round calculator, suitable as heat meter, cooling meter or bifunctional heat/cooling meter together with 1 or 2 flow sensors and 1, 2, 3 or 4 temperature sensors. The meter is intended for energy measurement in almost all types of thermal installations where water is used as the energy-conveying medium.

MULTICAL® 803 can, in addition to heat and cooling measurement, be used for leakage monitoring, permanent performance monitoring, power, flow and temperature limiter with valve control as well as for energy measurement in both open and closed systems.

According to EN 1434 and MID, MULTICAL® 803 can be designated as a "calculator" with separate type approval and verification. The MULTICAL® 803 calculator top can be separated from the connection base by means of a 4 mm Allen wrench when the installation seals have been broken.

MULTICAL® 803 has 2 flow sensor inputs that can be used for both electronic and mechanical flow sensors. The pulse value can be configured from 0.001 to 300 pulses/liter, and the calculator can be configured for all nominal flow sensor sizes from 0.6 to 15,000 m³/h. By default, the calculator is supplied with galvanically coupled flow sensor inputs that fit ULTRAFLOW® and, for example, reed switches. In addition, a connection PCB with 2 galvanically isolated flow sensor inputs can also be supplied.

The accumulated heat energy and/or cooling energy can be displayed in kWh, MWh, GJ or Gcal, all in the form of 7 or 8

significant digits plus measuring unit. The display has been specially designed with a view to obtaining long lifetime and sharp contrast in a wide temperature range and, by default, MULTICAL® 803 has backlit display.

MULTICAL® 803 can be mains-supplied either by 24 VAC or 230 VAC. A built-in battery backup also ensures that the meter continues the energy measurement for 6 years in case of a voltage failure. Furthermore, it is possible to connect a battery backup to module slot M1 by which, for example, M-Bus or wM-Bus will continue to operate during a voltage failure.

In designing MULTICAL® 803, great importance has been attached to flexibility through programmable functions and plug-in modules in order to secure optimum use in a wide range of applications.

Auto Detect UF enables the exchange of ULTRAFLOW® X4 on MULTICAL® 803 without the need for reconfiguration (change of the CCC code). MULTICAL® 803 can automatically adjust the pulse value and qp to match the connected ULTRAFLOW® X4 X4. Auto Detect UF is active with CCC code 8xx and is initiated when the calculator top and base are assembled. In addition, MULTICAL® 803 has automatic conversion between Pt100 and Pt500 sensors via Auto Detect Pt. The meter even detects the type of the connected temperature sensor. However, all connected sensors must be of the same type.

Mechanical data

Weight	1150 g incl. backup battery
Ambient temperature	5...55 °C. Condensing, closed location (indoor installation)
Protection class	IP65
Media temperatures ULTRAFLOW®	2...130 °C

At medium temperatures below the ambient temperature or above 90 °C in flow sensor, wall-mounting of the calculator is recommended.

Medium in ULTRAFLOW®	Water (district heating water as described in CEN TR 16911 and AGFW FW510)
Storage temperature	-25...60 °C (drained flow sensor)
Connection cable	M12: ø3...8 mm M16: ø4...10 mm
Supply cable	ø4...10 mm

Materials

Cast composite parts	Thermoplastic, PC 10 % GF
Gasket	Neoprene rubber
Push buttons	EPDM rubber

Approved meter data

Approvals

- Heat meter approval DK-0200-MI004-042
 - Temperature range θ : 2 °C...180 °C
 - Differential area $\Delta\theta$: 3 K...178 K
- Cooling meter TS 27.02 013
 - Temperature range θ : 2 °C...180 °C
 - Differential area $\Delta\theta$: 3 K...178 K
- Bifunctional heat/cooling meter Marked with DK-0200-MI004-042 and TS 27.2 013 as well as yearly mark of MID
 - Temperature range θ : 2 °C...180 °C
 - Differential range $\Delta\theta$: 3 K...178 K

The stated minimum temperatures are related to the type approval.
The meter has no cut-off for low temperature and thus measures down to 0.01 °C and 0.01 K.
