GENERAL DESCRIPTION

The Delta Underground Hydrant is a squat, compact valve suitable for use with water and natural fluids to a maximum temperature of 70°C and complies with the requirements of BS750, BS EN1074-2:2004 and EN14339:2005 (also to BS EN1074-6 for potable drinking water).

WRAS Approved for use with fresh drinking water, Delta's Type 2 valve is manufactured from corrosion resistant materials, easy to maintain and fitted as standard with a universal multi-flange Inlet for compatibility to most standard mating flanges and a 2½" BSRT male threaded outlet for use with 2½" BSRT inlet standpipes.
